

**AIR 4960**  
**Wireless Mesh Extender**  
Product Design for **AIRTIES**

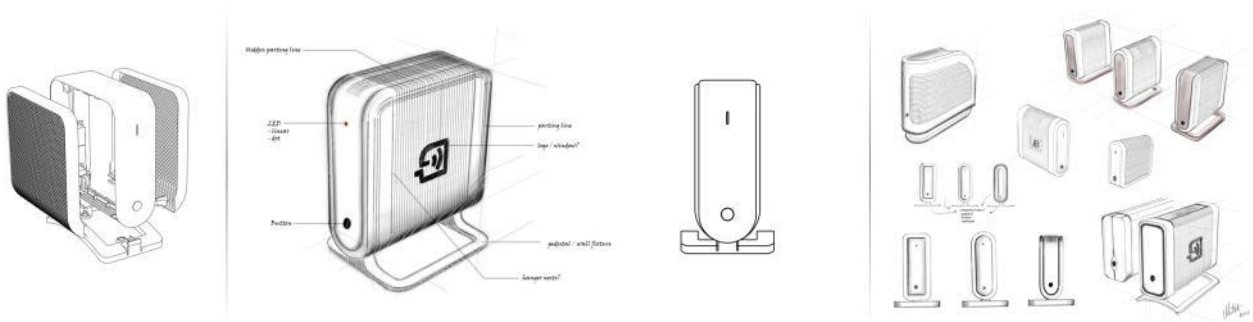

Airties' Wifi 6 family includes a dual-band Wi-Fi 6 Extender, a tri-band Wi-Fi 6 Extender, and a Wi-Fi 6 router.

In addition to increased speed and capacity, Wi-Fi 6 products are designed to support the growing density of connected devices within the home, delivering lower latency, enhanced battery life to IOT devices and reduced interference from neighboring Wi-Fi networks.

With AirTies Smart Wi-Fi software and AirTies Cloud, service providers can ensure they get the best out of the Wi-Fi 6 technology, proactively managing both Wi-Fi 6 and older, legacy devices in their customers' homes to guarantee the best possible performance.
